

Welcome to Enerray

Renewable Energy Solutions for the Mediterranean – **RES4MED** - is pleased to announce that **ENERRAY S.p.A** joined RES4MED as **Ordinary Member**.

The new Member will strengthen RES4MED's mission, proposing renewable energy and energy efficiency solutions to meet local needs.

Enerray S.p.A. founded in 2007, is an Italian company leader in the design, development and management of medium and large-scale photovoltaic plants, for its own plants and those owned by third parties. As a company of the Maccaferri Industrial Group, an industrial corporation active since 1879, the company provides turnkey solutions for industrial roofing, shelters, on-ground installations and greenhouses, competing as a reliable partner, that can guarantee the best performance and function of the plants.

EPC and O&M services of Enerray are based on a well established and continuously growing experience, acquired on various plants and on an overall power of more than 250 MWp and 550 MWp others under construction. Exploiting its acquired know-how, Enerray has rapidly expanded its portfolio by performing a steadily increasing number of projects.

News

[ACWA Power signs solar & wind pact in Egypt](#)

Saudi company ACWA Power has signed a pact with Egypt's New and Renewable Energy Authority (NREA) to build solar and wind parks in the West Nile area, local media report. This happened during Saudi King Salman bin Abdulaziz Al-Saud's visit to Cairo over the weekend

[JinkoSolar Supplies 23 MW of Solar Modules to Jordanian Solar Park](#)

Located 125 miles north of the Jordanian capital in Ma'an, the 23MW solar park uses 73,320 pieces of JinkoSolar high-efficiency Eagle modules. The project has been completed and is expected to produce approximately 47 GWh/year for the Red Sea port city of Aqaba and reduce CO2 emissions by about 25.000 tons/year

[How can Turkey's energy policies focus on local and renewable resources?](#)

Two major steps are expected from Turkey's energy administration this year: A well-designed coal policy and a detailed renewable energy scheme. Energy officials have repeatedly voiced signals about these policies by emphasizing the importance of creating a robust approach based on more local and renewable resources.

[Enel Begins Construction of Solar Park in Brazil](#)

Enel, through its subsidiary Enel Green Power Brasil Participações (EGPB), has started construction of the Lapa solar park, which is located in Bom Jesus da Lapa in Brazil's north-eastern state of Bahia.

[Saudi Arabia can take a page out of Dubai's renewables book](#)

Saudi Arabia will need to follow Dubai's lead and hike electricity prices by more than 50 per cent to support the expected growth of its renewable energy sector after the government's new diversification drive, experts said..

Event

Enhancing investments for clean tech solutions *Beyond Mena towards Africa: challenges and opportunities*
