

RES4MED towards Africa

A project to be announced the 19th of May at our event*registration: res4med@meetingenel.com***Why a new project for Africa?**

RES4MED is a network of international leaders engaged in promoting the deployment of renewable and energy efficiency solutions in the Mediterranean. At the end of 2015, RES4MED members decided to broaden the geographic scope of the Association towards sub-Saharan Africa in light of the huge potentials and growth opportunities for Africa's renewable energy sector, in order to "export" the successful Euro-Mediterranean cooperation towards the needs of the whole continent.

The strong commitment of RES4MED is officially confirmed by the strategic project RES4Africa, an initiative aiming at extending our relations with all African countries to be implemented starting from the consolidated position acquired in the MENA region where RES4MED started relevant partnerships and joint initiatives aimed at cooperating in specific fields and that now could stimulate further common programs involving African areas. News

[Luxor Solar supplies Turkey with solar modules for 4 solar parks à 1 MWp](#)

Luxor Solar GmbH, producer of high-performance solar modules with German engineering standards, has supplied 4 open land solar systems in Turkey with a capacity of 1 MWp. The solar parks, which were realised with a group of local investors, were connected to the grid in December of last year.

[TerniEnergia completes 82.5-MW PV plant in S Africa](#)

LApril 26 (SeeNews) - TerniEnergia (BIT:TER) said today its South African subsidiary has completed the construction of a 82.5-MWp photovoltaic (PV) park in Paleisheuwel, in South Africa's Western Cape province.

[Jordan set to reactivate third round of renewables](#)

A fresh addition of grid capacity is set to facilitate a third round of renewables feed-in tariff projects in Jordan. The 400 MW scheme was dropped in 2014 due to a lack of grid capacity but is now expected to go ahead as the \$160m Green Corridor transmission project is completed.

[Enel Begins Its Largest North American Solar Project](#)

Enel Green Power North America Inc. (EGPNA), a subsidiary of Italy-based Enel S.p.A., has begun construction of a utility-scale distributed solar project, named Aurora, in Minnesota. This project will mark the Enel Group's largest solar plant in North America.

[Saudi company Acwa Power to invest \\$12bn in the Egyptian market over five years](#)

In September 2014, the government announced a new feed-in tariff for new and renewable energy. Out of 187 offers, 136 Egyptian and international companies qualified to implement solar or wind power energy production plants.

Event

Enhancing investments for clean tech solutions

Beyond Mena towards Africa: challenges and opportunities

Rome , May 19th 2016 | 9:00 am - 16:30 pm
Enel Auditorium | Viale Regina Margherita, 125
registration: res4med@meetingenel.com

Public and private sector stakeholders from the Euro-MENA region and Sub-Saharan Africa to discuss lessons learned and identify remaining gaps, challenges and emerging issues on a smooth deployment of renewables. Beyond MENA and towards Africa: launch of the Project "RES4Africa".
RES4MED Survey on "Derisking investments in MENA" to be presented and discussed.

Under the patronage of
